All Threats

Influenza and Contagious Disease Prevention

The focus of this section will be to advise everyone about how to prevent the spread of contagious illnesses. Suggestions are all common sense and yet we often need to be reminded—get an ample amount of rest, eat nutritiously, stay home when ill, often and proper hand washing (hand sanitizing as a possible substitute), etc.

Additionally, LTC Region 4 will adhere to the following guidelines as prescribed by the CDC (Center for Disease Control):

1. If students/employees become ill while on campus, they will be asked to return home to recuperate in order to minimize the risk of infecting others.
2. Infected students/employees who need to leave the campus should do so without using public transportation.
3. Infected students/employees should stay in their homes until at least 24 hours after they no longer have a fever.
4. To minimize the spread of infection, classrooms, elevators, dining halls, and other high contact areas will be cleaned frequently and wiped down with disinfectant.
5. Alcohol based hand sanitizers will be available on campus.
6. Ill students will be provided options to complete classes. (Instructors should make arrangements with ill students to make up work and should not drop them from classes if they are ill with the flu).
7. A broad range of communication channels have been identified that will be used to reach students/employees to inform them of the situation at their college (First Call, Facebook, radio, TV, etc.).
8. Campus closures will be considered on a case by case basis.
9. Colleges will coordinate with the Department of Health and Human Services to provide vaccinations/immunizations as warranted.

The goal of these prevention measures will be to promote good health and hygiene habits for students, faculty, and staff.

H1N1 Flu Provisions

Note: LTC Region 4 will be using the following reporting process:

Any student that believes that they are experiencing symptoms of the flu (specifically fever or chills and cough or sore throat, runny nose, body aches, headache, tiredness, diarrhea, or vomiting) is asked to call 337-262-5962 Ext. 139 and report:

Student Name

Campus Name

Department

The line is ONLY to be used for persons exhibiting symptoms of flu. Since we don't know the strain, we do need all reports of any flu such as Type A, H1N1, etc.

ANY employee who calls in sick to work; administrators will follow up with the employee to determine if he/she has the flu. These numbers will be reported to the Region 4 Public Relations Officer on a daily basis.

Bomb Threats

A specific campus plan for dealing with bomb threats is available at each campus. See the campus administrator for more information.

Every threat should be taken seriously. If a bomb threat is received by mail, message, or telephone, record in writing the time and type of threat, location of bomb, expected time of detonation, if it is a male or female voice, and any other important information. If the threat is received by phone, keep the person on the phone as long as possible to determine any unusual voice characteristics such as raspy, hoarse, or stutter. Try to notice any background noises. Ask why the bomb was placed there and whom the caller wishes to hurt. **DO NOT HANG UP THE PHONE WHEN THE CALL ENDS. POLICE MAY BE ABLE TO REVERSE TRACE THE CALL.** Report a bomb threat to a supervisor, who will contact the proper authorities. The phone number of local law enforcement shall be placed in conspicuous places throughout agencies.

It is important that each employee visually scans his/her work area before leaving to look for unusual packages or something out of the ordinary. Do NOT touch anything suspicious but report it immediately to law enforcement personnel as you arrive at your designated outside area. Local law enforcement has no way of knowing what belongs in a work area and what does not. It is necessary that employees identify suspicious objects/packages for the bomb squad. Only take your personal items with you.

- Do not use a cell phone in or near the building or during the evacuation as this could trigger the bomb.
- Do not return to your work area until you receive the all-clear signal by the authorized person.

In the event of a bomb threat, the person taking the call should do the following:

- Get an accurate message. Try to write down each word.
- Request the caller to repeat the message as if you did not hear what was said. Do not get excited and fail to get the statements of the caller.
- Ask the caller where the bomb is located and when it is set to go off.
- Identify the caller's voice—whether male or female.
- Try to detect an accent or dialect.
- Try to determine sobriety.
- Note the caller's style of speech—erratic or firm or emphatic.
- Note any background noises or conversation
- Ask the name of the caller. Oddly enough, there have been cases where correct names and addresses have been given.
- Try to determine the length of the call.
- After taking the call, do not broadcast the matter and cause panic.
- When the call is completed, call the campus Administrator and advise that a bomb threat has been received. It will be the responsibility of the Campus Administrator to determine the need to evacuate.
